RRP £ 419

In 1978, the German Sigmund Jaehn launched into space as a research cosmonaut. Together with the Russian commander Valeri Bykovsky, he flew aboard the Soyuz 31 spacecraft to the Salyut 6 space station, where Jaehn conducted 25 experiments in the fields of medicine, biology, material sciences and geophysics. After 124 orbits and a flight duration of seven days, both returned to Earth.
